## Create List

*List details*

List name

Default "from" email

Default "from" name

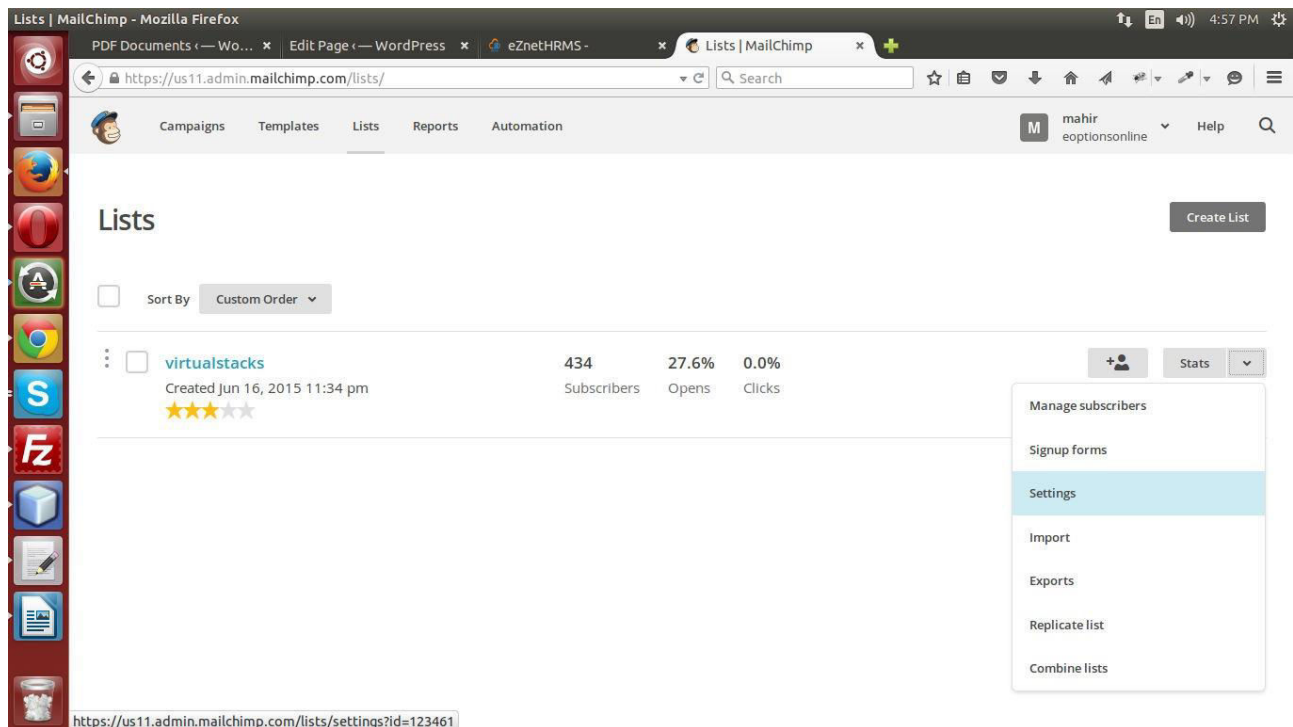

Remind people how they got on your list

Write a short reminder about how the recipient joined your list.

Contact information for this list · [Why is this necessary?](#)

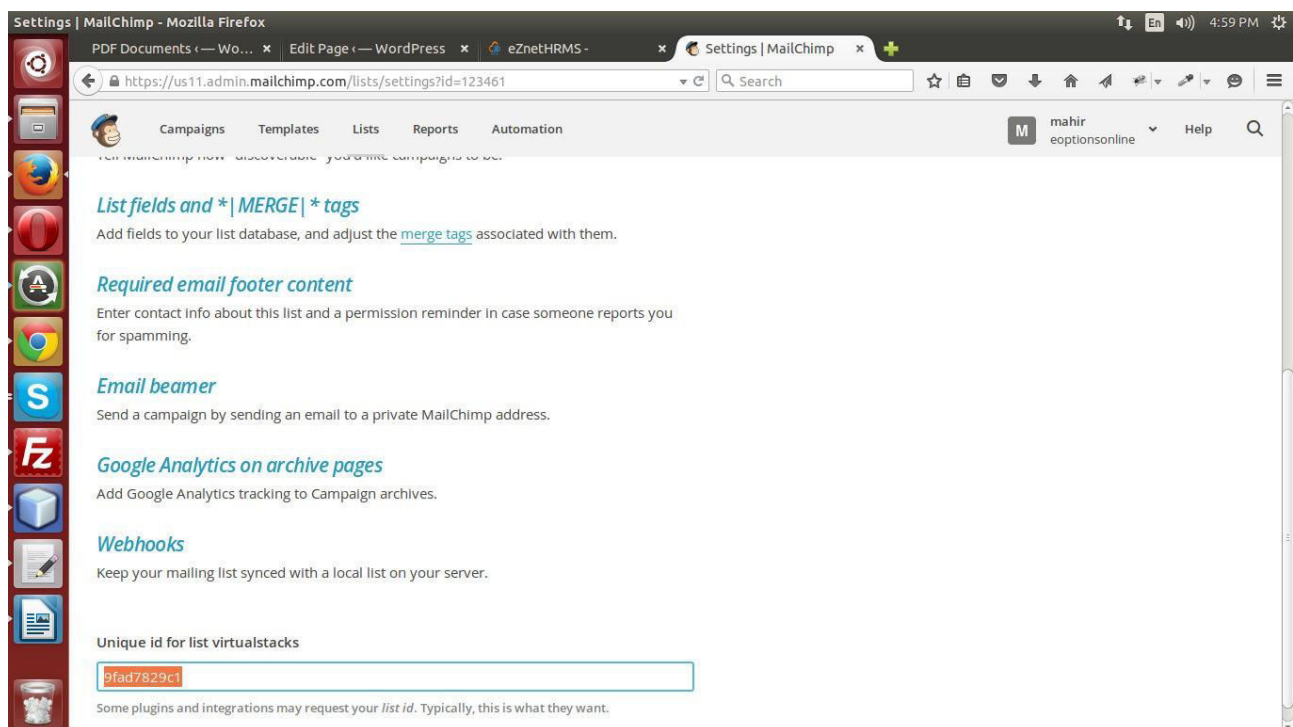

Fill all the required details and click on save.

After creating the list it will shown in list now on the right side click on settings. See the below screenshot:

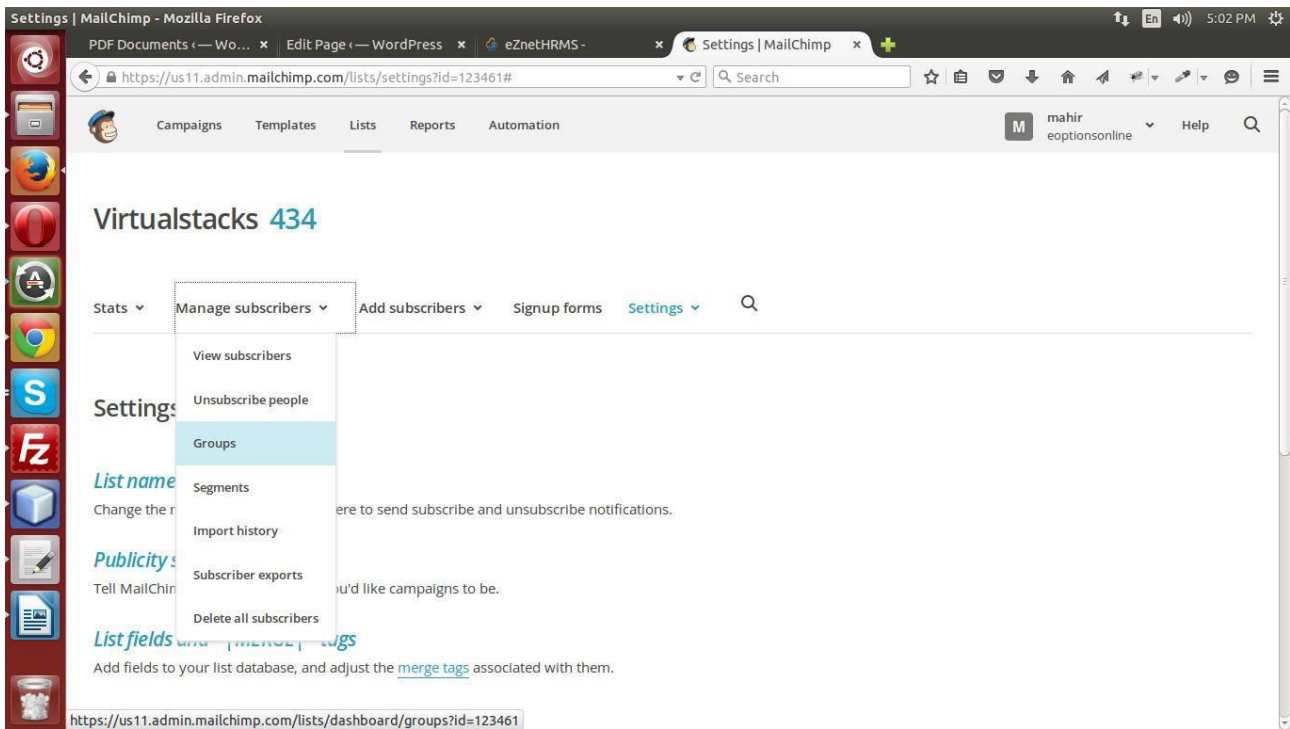

### **Mailchimp COMPANY ID:**

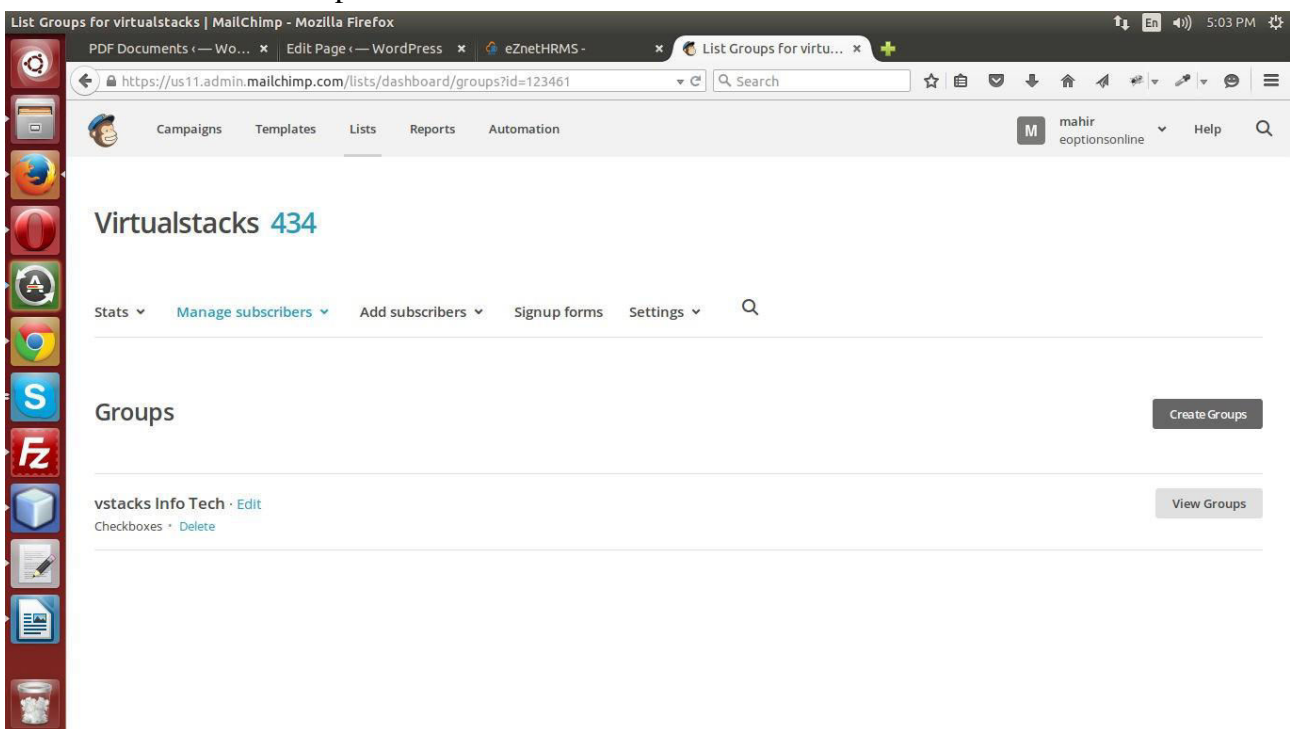

Unique ID for that list is the Mailchimp Company ID in Mailchimp setting on Mass mail Settings of eZnetCRM. See the below screenshot:

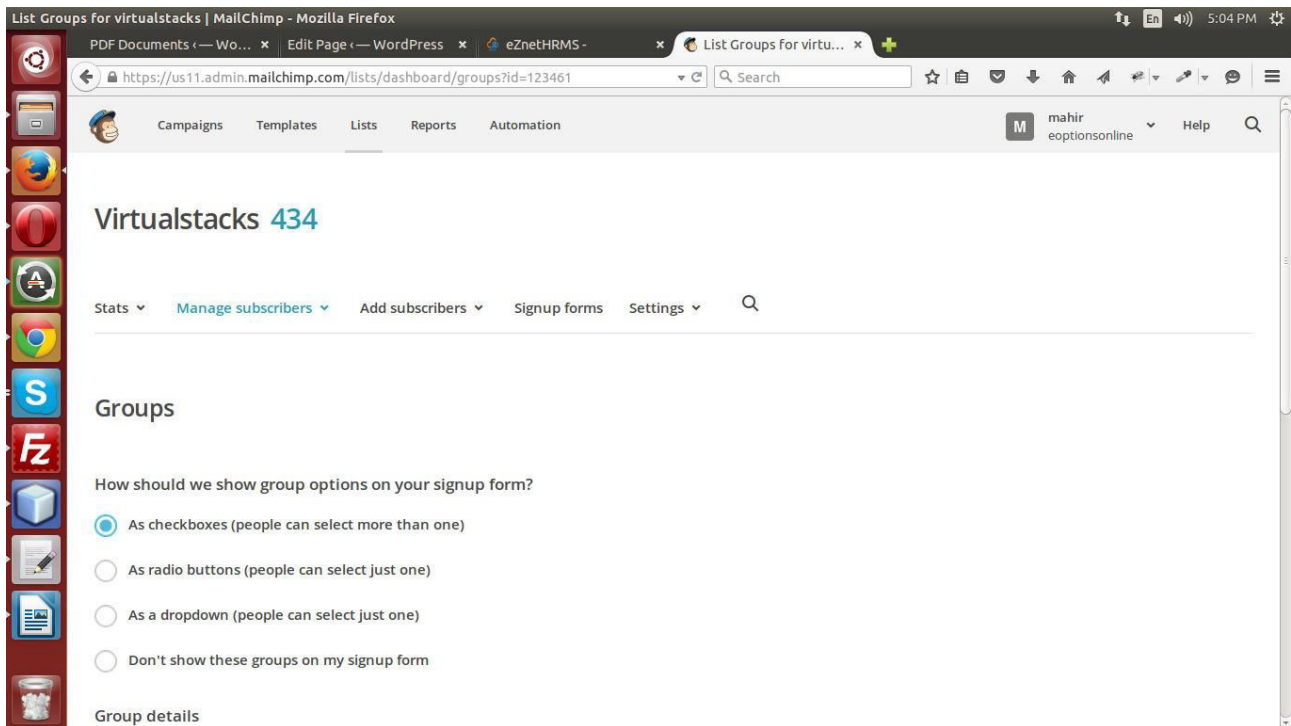

Now click on Manage Subscriber navigation then click on Groups. See the below screenshot:

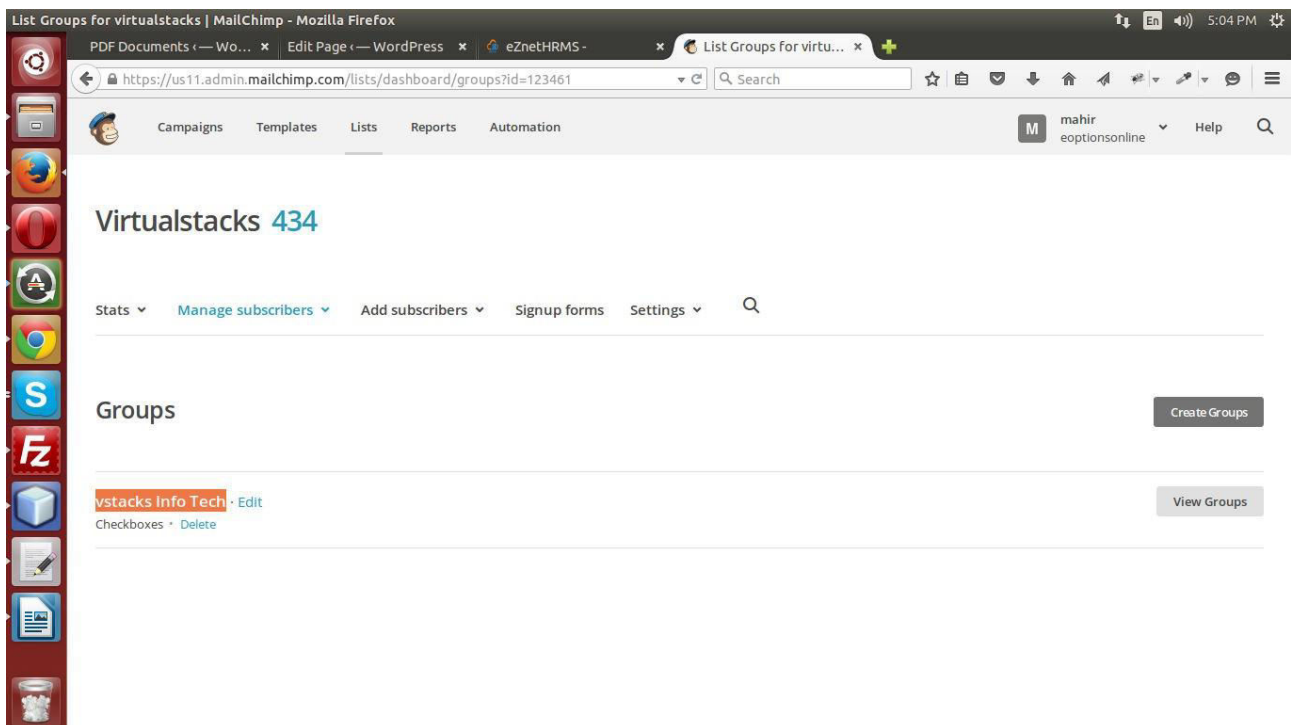

Now click on create Group button. See the below screenshot:

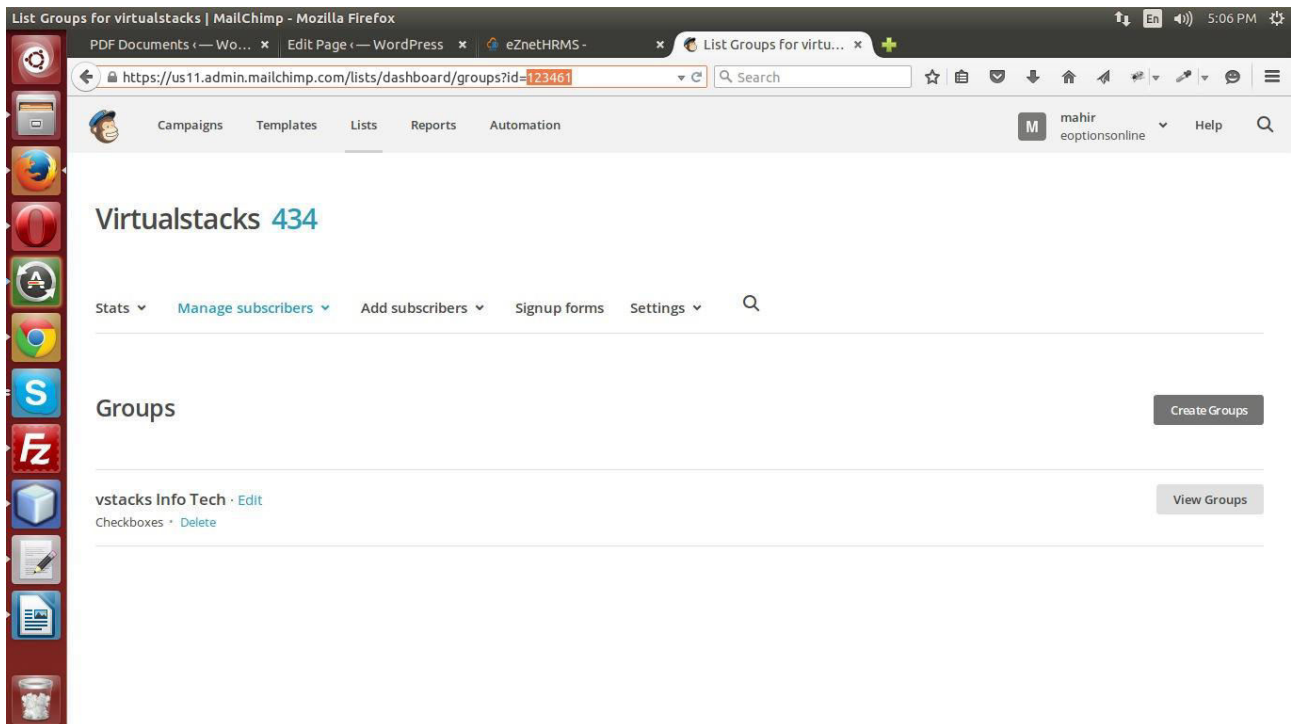

Now you will get the group name from here after creating the group. See the below screenshot:

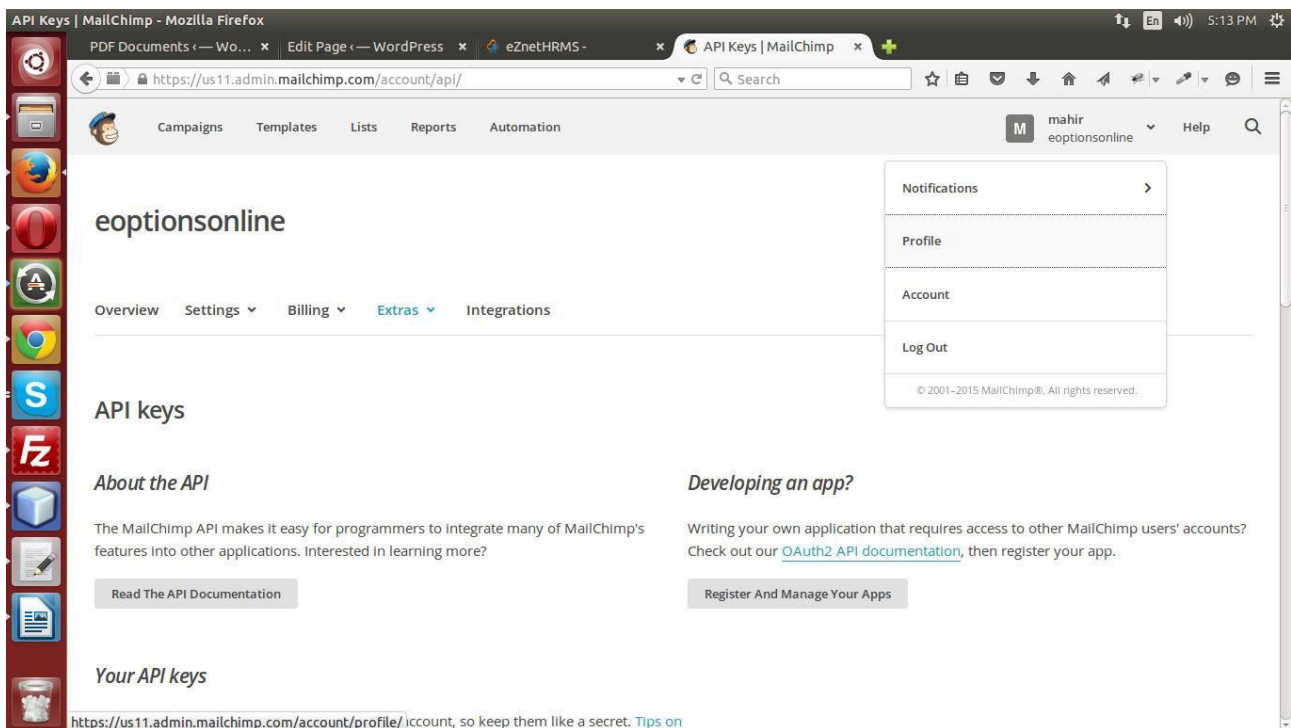

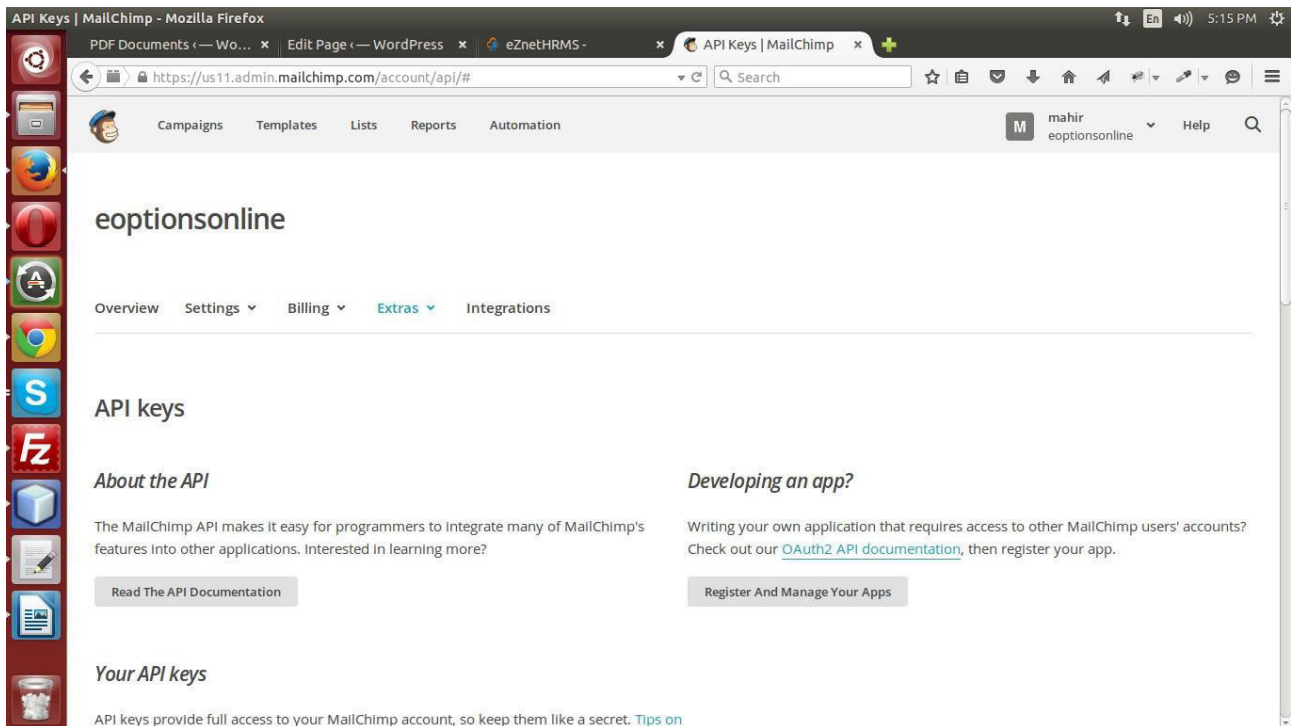

After creating the Group on the URL you will get the Group ID. See the below screenshot:

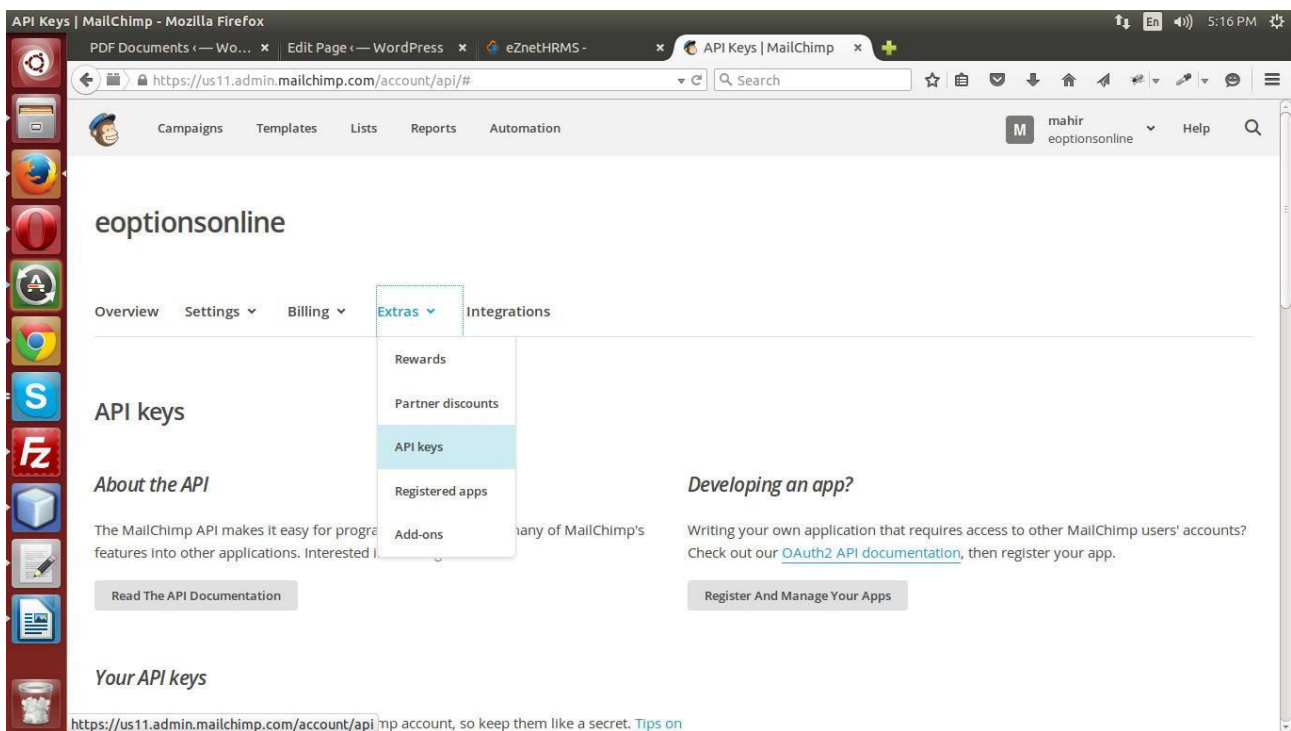

## API KEY:

To get the API Key click on the top right corner arrow of Username. Now click on Profile. See the below screenshot:

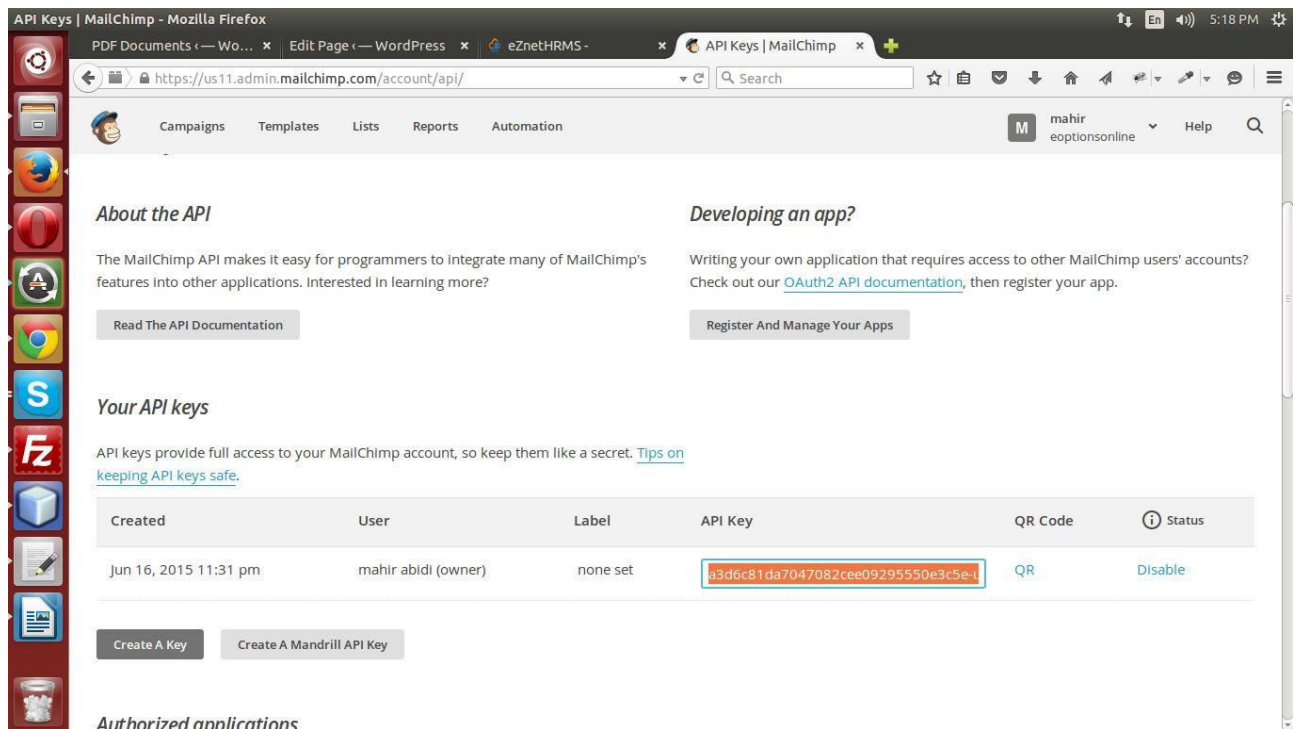

Now Click on Extras and then on API Keys. See the below screenshot:

Now a page will open here you will get the API Key. See the below screenshot:

The screenshot shows the MailChimp API Keys page in a Mozilla Firefox browser. The page has a navigation bar with links for Campaigns, Templates, Lists, Reports, and Automation. The main content area is divided into two columns. The left column contains the 'About the API' section, which explains that the MailChimp API makes it easy for programmers to integrate many of MailChimp's features into other applications. Below this is a button labeled 'Read The API Documentation'. The right column contains the 'Developing an app?' section, which encourages users to write their own applications that require access to other MailChimp users' accounts. Below this is a button labeled 'Register And Manage Your Apps'.

Below the 'About the API' section is the 'Your API keys' section. It states that API keys provide full access to your MailChimp account, so keep them like a secret. Below this is a table with the following columns: Created, User, Label, API Key, QR Code, and Status. The table contains one row with the following data:

Created	User	Label	API Key	QR Code	Status
Jun 16, 2015 11:31 pm	mahir abidi (owner)	none set	a3d6c81da7047082cee09295550e3c5e-l	QR	Disable

Below the table are two buttons: 'Create A Key' and 'Create A Mandrill API Key'.

At the bottom of the page is the 'Authorized applications' section.
