WEB DESIGN

At Virtual Stacks Systems™, we build brands. Your website is your digital calling card and you need it to be eye-catching and unique. Whether it is modern and state of the art or timeless & traditional, you can be 100% involved in the design, or redesign, of the concept you and our team of design experts create.

- Your concept leads, our designers follow
- Your own team of enthusiastic developers & graphic artists
- Get unique layout and design options
- Add a blog, ecommerce store, text and video to liven up your site
- Once launched, we stay at your service with scheduled updates and any design changes you would like to see

SEO SERVICES

Your website is only as good as its digital & online presence. Search Engine Optimization (SEO) is a key factor in the success of any business website. Our team of content management specialists channel their efforts to drive web traffic to and from your site.

- Online presence strengthened to generate visits
- Engaging content designed to turn site visits into site induced revenue
- Maximized Keyword Research draws targeted consumers to your site
- Search Marketing Integration (SMI) orchestrates Web 2.0 (social media) marketing

Why do I need SEO services?

Well, can search engines find and understand your website? Proper SEO will increase your site's visibility and direct potential customers to your website. What type of visibility does my site have? Can Virtual Stacks Systems™ help? Without applicable keyword research and traffic to your site via blogs, article links, and shares via the various social media sites, your site has little to no profitable visibility. Our SEO specialists compose engaging content that get your site noticed and respected.

E-COMMERCE

Security and efficiency are vital components to the successful operation of an online store. Virtual Stacks Services™ offers a number of ecommerce hosting plans that add value and trusted resources to your online business. Building a website with us means your online store is user friendly and effectively monitored 24/7.

- Showcase your products & services with an easy-to-use checkout process
- Customize your storefront to be user friendly
- Fast & Secure Checkout
- Efficient payment processing
- Mobile App to allow shopping online anywhere

EZNET CRM

Centralize the tracking of all customer interaction with a Customer Relationship Management (CRM) system. As one of the top ranked cloud-based systems in its class, eZnet CRM has proven to be an effective tool to manage sales processes, client relationships and mutually beneficial B2B relationships.

Benefits include:

- Monitor all business to client communication & track interaction
- Increase accountability
- Fully customizable cloud-based software that will scale to evolve with your growing business
- Forecast profitable ventures and strategize future marketing campaigns
- Reduce uncalculated risks with analytical reports generated by comprehensive data collection
- Storage & Resource limits are reduced without an increase in pricing thanks to cloud computing

Features include:

- The mobile app makes your CRM accessible on the go
- Easy to navigate & personalize dashboard leading to entire CRM
- Real-time ticket modules allow immediate response to customer requests & issues
