FedEx Web Services for Office and Print
Developer Test Key Enablement Request Form

By default, test credentials are initially disabled for FedEx Web Services for Office and Print. After receiving test credentials, use this form to request that they be enabled.

Please complete all of the fields below.

Company Name

First Name

Last Name

E-mail

Developer Test Key

Which Web Service(s) do you intend to use?

Print Online Web Service   Office Order Web Service

Please briefly describe your company and your company's intended use of FedEx Web Services for Office and Print.

I understand and agree that any orders placed via the FedEx Office^{SM} Print Online application in association with any use of my FedEx Web Services for Office and Print integration solution - including the testing, troubleshooting, certification, or general use of the solution and regardless of whether "test" or "production" credentials are employed - will be considered production (live) orders. I further understand and agree that any such orders will be received, fulfilled, and billed accordingly by FedEx to the purchaser of record.

I AGREE   I DISAGREE

E-mail the completed request to officewebservices@fedex.com

PLEASE NOTE
This form is not intended for use in association with FedEx Web Services for Shipping implementations. If your primary integration needs involve the rating, shipping, and tracking of packages, please visit the FedEx Web Services for Shipping section of the FedEx Developer Resource Center for documentation and support relevant to your solution.
